GLOBAL FUND RELEASES GOVERNANCE HANDBOOK

A new Governance Handbook issued by the Global Fund describes the Fund's various structures and governance processes. The handbook was conceived primarily as an operations guide for members of the Global Fund Board and their delegations, but it has also been made public.

Separate sections of the handbook are devoted to topics such as the history of the Global Fund, the roles of the Board and its committees, and the current funding model and how it may evolve.

The handbook is available on the Global Fund website [here](#).
