

In January 2016, Aidspan published a report on willingness-to-pay commitments in 13 countries. An <u>article</u> about the report appeared in GFO.

Subsequently, we learned that the WTP commitment shown in the report for Suriname was incorrect. Rather than making a commitment of \$1.5 million, Suriname made a commitment of \$18.4 million.

Aidspan has corrected the figures in the report and has posted an updated version <u>here</u> (see The "Fair Share" of Shared Responsibility: An Aidspan Report on Willingness to Pay).

The incorrect amount for Suriname also appeared in the GFO article in a table. The corrected table is as follows:

Table: Actual WTP as a proportion of minimum WTP requirement (\$ million)

Country	Minimum WTP requirement		''
Iran	6.1 m	77.4 m	1275%
Thailand	32.7 m	309.5 m	946%
Suriname	2.3 m	18.4 m	800%

8.6 m	68.0 m	789%
1.5 m	11.2 m	762%
139.5 m	1,000 m	748%
3.1 m	14.5 m	468%
27.7 m	124.1 m	448%
3.8 m	12.2 m	317%
1.4 m	3.9 m	289%
1.5 m	4.4 m	286%
1.6 m	4.3 m	265%
5.7 m	13.6 m	237%
	1.5 m 139.5 m 3.1 m 27.7 m 3.8 m 1.4 m 1.5 m	1.5 m 11.2 m 139.5 m 1,000 m 3.1 m 14.5 m 27.7 m 124.1 m 3.8 m 12.2 m 1.4 m 3.9 m 1.5 m 4.4 m 1.6 m 4.3 m

The statement in the article that Suriname committed less than the minimum WTP requirement was incorrect.

Unrelated to the Suriname data, there was another error in the GFO article: The total WTP investment of the 13 countries in the study was \$1.66 billion, not \$1.88 billion.

Aidspan regrets any inconvenience caused by the incorrect information.
