NEW TECHNICAL SUPPORT PUBLICATION BY THE GTZ BACKUP INITIATIVE

The GTZ BACKUP Initiative has published a guide on where technical support for capacity development of Global Fund recipients is most needed, who is able to provide it, and how to make best use of it.

The guide, entitled “Accelerating action: A technical support guide to develop capacity and to benefit from global health financing,” is intended for use by professionals working on HIV, TB and malaria projects that are financed by the Global Fund, World Bank, and other such mechanisms. The publication is available at www.gtz.de/backup-initiative.
