The Aidspan Guide on the Roles and Responsibilities of CCMs in Grant Oversight

CCMs are only now beginning to focus on their role in overseeing the implementation of Global Fund grants. This guide describes what grant oversight is, and provides basic advice on how a CCM can plan and implement oversight. It includes some real-life examples from CCMs that have already started to do oversight. The primary target audience for this guide is CCMs. The guide will also be of interest to principal recipients (PRs) and large sub-recipients (SRs), as well as other stakeholders who are not on the CCM but who have an interest in the functioning of the CCM.

This guide is available at www.aidspan.org/guides in English, French, Spanish and Russian.

A Beginner's Guide to the Global Fund

The purpose of this guide is to provide a broad introduction to the Global Fund for people who have little or no prior experience of the Fund – ranging from new CCM members, to NGOs, to government officials, to new sub-recipients, to journalists who have to write about the Fund. This guide comes in three versions: the full guide (about 60 pages); an eight-page summary, and a two-page summary.

All three versions of this guide are available at www.aidspan.org/guides in English, French, Spanish and Russian.

Key Strengths of Round 8 Proposals to the Global Fund

The purpose of this report is to provide information to Global Fund applicants on key attributes of a strong proposal. The report is based on an analysis of the strengths of all approved Round 8 proposals, as identified by the Technical Review Panel (TRP) when it reviewed the proposals.

This report is available at www.aidspan.org/aidspanpublications in English, French, Spanish and Russian.

[2. COMMENTARY: CCM Requirements: How Much Flexibility Is Appropriate?](#)

"Some of the decisions of the Global Fund's Screening Review Panel are scandalous – or at least, they would be if it wasn't so obvious that its members are trying to do what is 'best' in a complex world. Does the Secretariat believe that the Fund's minimum requirements regarding CCMs are too stringent? If so, why doesn't the Secretariat ask the Board to soften the requirements?"

[5. NEWS: Report Says Funding for Key Populations in Latin America and Caribbean Is Scarce](#)

Only a small proportion of funds for sub-recipients of Global Fund grants in Latin America and the Caribbean are reaching organisations representing the key population groups where the HIV epidemic is largely concentrated, according to a report prepared by the International HIV/AIDS Alliance.

[2. COMMENTARY: Full Disclosure Works](#)

“Anyone who imagines that the Global Fund could disburse billions of dollars without some of it being mis?used is naive. The question is not whether some of the money will be diverted, but rather how much, and whether the diversion is detected, and what is done once it is detected.”

[3. NEWS: Round 9 Approved Grants Will Exceed Two Billion Dollars](#)

[2. NEWS: Health Impact Evaluation – Major Findings](#)

The rapid increase in funding from all partners for the three diseases has resulted in a major expansion in access to services in these countries and has improved coverage of interventions, which will likely impact disease burden. However, gaps in the availability of data prevented the evaluation from actually measuring the impact of the Global Fund and its partners on the three diseases. These are the major findings from the Health Impact Evaluation.

[3. NEWS: Highlights from the Synthesis Reports of the Five-Year Evaluation](#)

The Global Fund has laid the foundation for continued, successful scale-up. However, not all of the original expectations of the Global Fund have been realised. Concerted effort will be required to continue the revision and refinement of the Global Fund’s principles, systems and practices in order to increase funding for scaling up, especially in light of the current financial environment. These are the main conclusions of the full Five-Year Evaluation.
